

DAMIAN ALESSANDRO ESPINOSA

Systems Engineer · Full-Stack Web Developer

Cali, Colombia | damianespinosadev@gmail.com | +57 317 822 2667 | github.com/AsherAST | linkedin.com/in/damian-espinosa-6b46a8277

PROFESSIONAL PROFILE

Systems Engineer and full-stack web developer. I build complete applications with Next.js, React and TypeScript: online stores with transactional checkout, dashboards with charts and roles, Kanban task managers and real-time chat, with PostgreSQL, authentication, automated testing (Vitest, Playwright) and Vercel deployment with CI/CD. I combine this with solid technical support and customer service experience: incident management through Zendesk, clear and assertive communication, and a strong focus on effective problem solving.

WORK EXPERIENCE

Customer Service Representative2025

- Comprehensive, real-time technical support to customers, managing requests through Zendesk to identify problems and deliver effective solutions in a timely manner.
- Structured ticket management: prioritization of requirements, escalations to higher levels and continuous follow-up until full resolution (open, pending, resolved).
- Clear and empathetic communication to guarantee user satisfaction in fast-paced, high-demand environments.

Cybersecurity Teaching Assistant2025

Universidad del Valle

- Support in the Cybersecurity course with class materials and student advising, fostering understanding of security concepts and practices.

University Project2024

Universidad del Valle

- Software Development: order and inventory management app for a pizzeria and a learning app built with JavaScript and React.

PROJECTS

Online Store — Full-stack e-commerce

tienda-puce-nine.vercel.app

Catalog with search and filters, persistent cart, transactional checkout and an admin panel with roles. *Next.js · Prisma · PostgreSQL · Auth.js · Zod · Tailwind · 62 tests*

Dashboard — Inventory & sales

dashboard-gamma-roan-35.vercel.app

KPIs, interactive charts, ADMIN/VIEWER roles, CSV/PDF export. *Next.js · Recharts · PostgreSQL · Vitest · Playwright*

Real-time chat

github.com/AsherAST/chat

Rooms, persisted history, typing indicator and user presence. *Node.js · Socket.io · JWT*

TaskFlow — Kanban board

taskflow-six-lac.vercel.app

Board with drag & drop and from-scratch authentication. *Next.js · PostgreSQL · Prisma · JWT · Zod*

Construction company — Corporate site

constructora-six-theta.vercel.app

Responsive site with a working contact form. *Next.js · Tailwind · Resend*

SKILLS

Web Development

Next.js, React, TypeScript, JavaScript, Tailwind CSS, Node.js, Prisma, PostgreSQL, MySQL, Auth.js/JWT, Socket.io, Zod, Vitest, Playwright, GitHub Actions, Vercel.

Support, Tools and Management

Ticket management (Zendesk), communication (Slack), Office Suite (Word, Excel), Figma, Power BI, Pandas, Jupyter Notebook.

Security and Networks

Security incident analysis and cybersecurity: identification, containment, eradication and recovery, security controls and vulnerability scanning.

Soft Skills

Analytical thinking, assertive communication, attention to detail, calm under pressure, teamwork and continuous improvement.

EDUCATION

Systems Engineering Degree2020–2025

Universidad del Valle
